Fat-to-Fit

Foundations · Level 1 · 3 days · Home

Your first nine weeks of training. Three short full-body sessions a week, at home, with easy-to-follow versions of every movement and a coaching cue for each one. No experience needed — just a band, a chair and a bit of floor.

How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

Coach's rules for beginners

Form before reps
Stop a set when your form breaks. The target is a guide, not a test.

Leave 2 in the tank
Finish every set feeling you could do 2 more good reps. That is the right effort for now.

Rest about 60 seconds
The rest timer starts when you tick a set. Breathe slowly: in through the nose, long breath out.

Earn the next step
Hit the top of the rep range on every set for two sessions in a row? Move to the harder version.

Sore is normal, sharp is not
Stiff muscles for 1–2 days are expected in week 1. Sharp or joint pain: stop and swap the exercise.

Walk on the days between
20–30 minutes of easy walking speeds up recovery and adds to your fat loss without wearing you out.

Protein + sleep
A palm of protein at every meal and 7–9 hours of sleep. This is where the results are actually made.

Rate every session
Use the 1–10 effort scale in the tracker. Your coach uses it to know when to push and when to hold.

Before you start

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- Home safety: use a chair that can't slide (back it against a wall) and clear space around you.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

Nutrition

Protein high · **Fats** moderate · **Carbs** moderate

- Protein at every meal: eggs, Greek yoghurt, chicken, fish or red meat.
- Half the plate vegetables; a fist of rice, pasta or sweet potato.
- Fruit daily, water all day — simple beats perfect.

Your full targets, meal plan and grocery list: the Code9 Nutrition Guide and your AI Nutrition Coach.

The phases

PHASE 1 Weeks 1–3

Learn the Moves

Learn the five basic patterns — squat, push, pull, hinge and brace — with supported versions you can do well.

Target effort **4–5** / 10

PHASE 2 Weeks 4–6

Build Confidence

Same patterns, harder versions: more reps, less support and a little more time under tension.

Target effort **5–6** / 10

PHASE 3 Weeks 7–8

Own It

Add load and single-leg work — and finish the nine weeks stronger than you started.

Target effort **6–7** / 10

WEEK 9 Peak & Test

Peak & Test

Taper, test your Code9 benchmarks and finish strong.
