Fat-to-Fit

Foundations · Level 1 · 3 days · Gym

Walk into the gym with a plan. Three full-body sessions a week using the machines and dumbbells that are easiest to learn, with a coaching cue for every exercise — so you always know what to do and how it should feel.

How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

Coach's rules for beginners

Form before reps
Stop a set when your form breaks. The target is a guide, not a test.

Leave 2 in the tank
Finish every set feeling you could do 2 more good reps. That is the right effort for now.

Rest about 60 seconds
The rest timer starts when you tick a set. Breathe slowly: in through the nose, long breath out.

Earn the next step
Hit the top of the rep range on every set for two sessions in a row? Move to the harder version.

Sore is normal, sharp is not
Stiff muscles for 1–2 days are expected in week 1. Sharp or joint pain: stop and swap the exercise.

Walk on the days between
20–30 minutes of easy walking speeds up recovery and adds to your fat loss without wearing you out.

Protein + sleep
A palm of protein at every meal and 7–9 hours of sleep. This is where the results are actually made.

Rate every session
Use the 1–10 effort scale in the tracker. Your coach uses it to know when to push and when to hold.

Before you start

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- Ask a staff member to show you how to adjust each machine the first time — seat height matters.
- Start every new exercise with a weight you could lift 15+ times. You will add load from week 2.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

My settings & starting weights

In your first week, go through every lift with a light weight and write down your setup — seat and pad numbers on machines, grip or stance on free weights — and the weight you start with. Next time you set up in seconds.

Every lift, every time

- **Machines:** line the moving joint up with the pivot (the coloured dot), pin all the way in.
- **Free weights:** same grip and stance every session — note it here.
- **Start weight:** one you could lift 3–4 more times than the target.

How to move

- **2 seconds** up · **1 second** hold · **3 seconds** down.
- Never let a weight drop or a stack slam.
- Breathe out as you push or pull.
- Pain (not effort)? Stop, lighten or shorten the range.

EVERY WEEK

Staying on track

Start each week here: read the line, do the one small action and tick it, and write your if · then plan for whatever could get in the way. Week 3 is where most people stop — the shaded rows are your milestones: week 3, halfway and the final week. R is the bonus Reset week.

Never miss twice
Missing one session is life. Missing two in a row is the start of quitting — so the session after a miss is the one that counts.

Plan it like a meeting
Decide the day and time for every session at the start of the week. "When I have time" never comes.

If · then
Name what could get in the way, and what you'll do instead. "If I work late, I'll train at 7 am."

Bad sessions count
A short or light session on a bad day keeps the habit alive. Showing up beats a perfect plan.

WK	YOUR FOCUS · THIS WEEK'S SMALL ACTION	✓	IF · THEN

WEEK 9 · PEAK & TEST

Your Code9 benchmarks

Test in week 9 while you're fresh. If you did the same tests at the start, write those numbers too — this page is your 9 weeks in one look.

BENCHMARK	START (OPTIONAL)	WEEK 9
Max Push-Ups One set, full range. Knee push-ups count — note which you did.		
Plank Hold Hold with perfect form — stop when the hips sag.		
1-Minute Squats As many full bodyweight squats as you can in 60 seconds.		
2 km Time Trial Run, jog or brisk walk — log your time in minutes.		

What changed?

That's Code9. Nine weeks, done. Log your results online too — your coach uses them to set up your next block.

EXERCISE INDEX

Every exercise, with its cues

Watch the moving demo of any exercise in the Exercise Library of your online program.

Bird Dog
Hands under shoulders, knees under hips · Reach long, not high · Keep the hips level

Dead Bug
Lower back pressed to the floor · Opposite arm and leg · Slow and controlled

Dumbbell Bench Press
Feet flat, shoulder blades back · Lower to the sides of the chest · Press up and slightly in

Dumbbell Bicep Curls
Elbows by your sides · Turn palms up as you lift · Lower slowly

Dumbbell Romanian Deadlifts
Soft knees · Push the hips back · Weights close to the legs, flat back

Dumbbell Shoulder Press
Ribs down · Press straight up · Lower to chin height

Farmer Carry
Heavy weights, tall posture · Shoulders down and back · Short, steady steps

Glute Bridges
Heels close to your glutes · Push through the heels · Squeeze 2 seconds at the top

Goblet Squats
Weight held at the chest · Elbows inside the knees · Stand up as one piece

Incline Push-Ups
Hands just wider than shoulders · Squeeze glutes, ribs down · Chest to the edge

Kettlebell Deadlifts
Bell between the feet · Hips back, flat back · Stand tall, squeeze glutes

Kettlebell Swings
Hinge, don’t squat · Snap the hips forward · Bell floats to chest height

Lat Pulldown
Grip just wider than shoulders · Pull the bar to your upper chest · Lean back slightly, chest up

Leg Press
Back flat on the pad, feet hip-width mid-platform · Lower until the knees reach about 90° · Push through the whole foot — don’t lock the knees

Plank
Elbows under shoulders · Squeeze glutes and quads · Breathe — don’t hold your breath

Plank with Shoulder Taps
Feet wide for balance · Hips don’t rock · Slow taps

Reverse Crunches
Knees to chest · Curl the hips off the floor · Lower slowly — no swinging

Rowing Intervals
Hard means hard — but controlled · Drive with the legs · Easy minute: breathe it back down

Rowing Machine
Legs, body, then arms · Arms, body, then legs on the return · Easy, steady pace

Seated Cable Row
Sit tall, slight knee bend · Pull handle to the belly button · Squeeze, then reach long

Side Plank
Elbow under shoulder · Hips high, body straight · Knees down to make it easier

Step-Ups
Whole foot on the step · Push through the top leg · Lower slowly — don’t drop

Tricep Pushdowns
