# Fat-to-Fit

## Foundations · Level 1 · 3 days · Home

Your first nine weeks of training. Three short full-body sessions a week, at home, with easy-to-follow versions of every movement and a coaching cue for each one. No experience needed — just a band, a chair and a bit of floor.

# How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

## Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

## How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

## Coach's rules for beginners

### Form before reps

Stop a set when your form breaks. The target is a guide, not a test.

### Leave 2 in the tank

Finish every set feeling you could do 2 more good reps. That is the right effort for now.

### Rest about 60 seconds

The rest timer starts when you tick a set. Breathe slowly: in through the nose, long breath out.

### Earn the next step

Hit the top of the rep range on every set for two sessions in a row? Move to the harder version.

### Sore is normal, sharp is not

Stiff muscles for 1–2 days are expected in week 1. Sharp or joint pain: stop and swap the exercise.

### Walk on the days between

20–30 minutes of easy walking speeds up recovery and adds to your fat loss without wearing you out.

### Protein + sleep

A palm of protein at every meal and 7–9 hours of sleep. This is where the results are actually made.

### Rate every session

Use the 1–10 effort scale in the tracker. Your coach uses it to know when to push and when to hold.

**Before you start**

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- Home safety: use a chair that can't slide (back it against a wall) and clear space around you.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

# My settings & starting weights

In your first week, go through every lift with a light weight and write down your setup — seat and pad numbers on machines, grip or stance on free weights — and the weight you start with. Next time you set up in seconds.

### Every lift, every time

- **Machines:** line the moving joint up with the pivot (the coloured dot), pin all the way in.
- **Free weights:** same grip and stance every session — note it here.
- **Start weight:** one you could lift 3–4 more times than the target.

### How to move

- **2 seconds** up · **1 second** hold · **3 seconds** down.
- Never let a weight drop or a stack slam.
- Breathe out as you push or pull.
- Pain (not effort)? Stop, lighten or shorten the range.

EVERY WEEK

# Staying on track

Start each week here: read the line, do the one small action and tick it, and write your if · then plan for whatever could get in the way. Week 3 is where most people stop — the shaded rows are your milestones: week 3, halfway and the final week. R is the bonus Reset week.

**Never miss twice**
Missing one session is life. Missing two in a row is the start of quitting — so the session after a miss is the one that counts.

**Plan it like a meeting**
Decide the day and time for every session at the start of the week. "When I have time" never comes.

**If · then**
Name what could get in the way, and what you'll do instead. "If I work late, I'll train at 7 am."

**Bad sessions count**
A short or light session on a bad day keeps the habit alive. Showing up beats a perfect plan.

| WK | YOUR FOCUS · THIS WEEK'S SMALL ACTION | ✓ | IF · THEN |
|---|---|---|---|
| 1 | **"You don't need to feel ready. You need to show up."** Complete every planned session this week — even the ones that feel bad. | ☐ | IF _____ THEN _____ |
| 2 | **"The novelty is wearing off. That's where the real training starts."** Write down the days and times you'll train next week. | ☐ | IF _____ THEN _____ |
| 3 | **"This is the week most people stop. You're not most people."** Never miss twice: if you skip a day, the next session is non-negotiable. | ☐ | IF _____ THEN _____ |
| 4 | **"Week 4. You've already outlasted the excuse."** Compare one lift with week 1 — write the difference in your notes. | ☐ | IF _____ THEN _____ |
| 5 | **"Halfway. Look back at week 1 — that was you five weeks ago."** Write down one thing that feels easier now. | ☐ | IF _____ THEN _____ |
| 6 | **"Strong isn't a feeling. It's a habit you've built."** Check your progress: weight, one measurement, one photo. | ☐ | IF _____ THEN _____ |
| 7 | **"Push the weight, not the date."** Add one rep or one plate somewhere this week. | ☐ | IF _____ THEN _____ |
| 8 | **"The last weeks show who you've become."** Plan your week 9: when you'll test, and what you want to beat. | ☐ | IF _____ THEN _____ |
| 9 | **"Nine weeks. Code9. Done — and just getting started."** Test your benchmarks and write down your week 1 vs week 9 numbers. | ☐ | IF _____ THEN _____ |
| R | **"Recovery is training too. Back off now, come back stronger."** Pick your next block — and the date you'll start it. | ☐ | IF _____ THEN _____ |

### Nutrition

**Protein** high · **Fats** moderate · **Carbs** moderate

- Protein at every meal: eggs, Greek yoghurt, chicken, fish or red meat.
- Half the plate vegetables; a fist of rice, pasta or sweet potato.
- Fruit daily, water all day — simple beats perfect.

Your full targets, meal plan and grocery list: the Code9 Nutrition Guide and your AI Nutrition Coach.

## The phases

PHASE 1 Weeks 1–3

### Learn the Moves

Learn the five basic patterns — squat, push, pull, hinge and brace — with supported versions you can do well.

Target effort **4–5** / 10

PHASE 2 Weeks 4–6

### Build Confidence

Same patterns, harder versions: more reps, less support and a little more time under tension.

Target effort **5–6** / 10

PHASE 3 Weeks 7–8

### Own It

Add load and single-leg work — and finish the nine weeks stronger than you started.

Target effort **6–7** / 10

WEEK 9 Peak & Test

### Peak & Test

Taper, test your Code9 benchmarks and finish strong.

Target effort **6–7** / 10

WEEK 9 · PEAK & TEST

# Your Code9 benchmarks

Test in week 9 while you're fresh. If you did the same tests at the start, write those numbers too — this page is your 9 weeks in one look.

| BENCHMARK | START (OPTIONAL) | WEEK 9 |
|---|---|---|
| **Max Push-Ups**<br>One set, full range. Knee push-ups count — note which you did. | | |
| **Plank Hold**<br>Hold with perfect form — stop when the hips sag. | | |
| **1-Minute Squats**<br>As many full bodyweight squats as you can in 60 seconds. | | |
| **2 km Time Trial**<br>Run, jog or brisk walk — log your time in minutes. | | |

## What changed?

**That's Code9.** Nine weeks, done. Log your results online too — your coach uses them to set up your next block.
