Fat-to-Fit

Momentum · Level 2 · 4 days · Home

For when you've got the basics and want more. Four sessions a week — lower, upper, full-body and a conditioning circuit — with a pair of dumbbells, a band and a chair. Clear rules tell you when to push and when to pull back.

How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

The push and the pull

Push: add one thing

Each week add a rep, a set or a little weight. One at a time — never all three.

Push: honest last set

Your final set should finish 1–2 reps short of failure, with clean form.

Pull: read your effort

Rated a session 2+ points above the target? Keep the same load next week instead of adding.

Pull: sleep & soreness

Under 6 hours of sleep or still sore from last time? Drop one set per exercise today.

Rest 60–90 seconds

Strength sets: 60–90 seconds (the timer starts when you tick a set). Circuits: follow the work/rest in the tip.

2 seconds down

Control the lowering on every strength rep. Slower negatives build more muscle and protect the joints.

Deload if you stall

Feeling flat for a whole week? Do one week at 2 sets per exercise, then build again.

Log the numbers

Write the weight and reps you actually did — next time beat it by one rep or 1–2 kg.

Before you start

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- Home safety: make sure chairs, steps and tables are sturdy and can't slide, and clear space before jumping exercises.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

My settings & starting weights

In your first week, go through every lift with a light weight and write down your setup — seat and pad numbers on machines, grip or stance on free weights — and the weight you start with. Next time you set up in seconds.

Every lift, every time

- **Machines:** line the moving joint up with the pivot (the coloured dot), pin all the way in.
- **Free weights:** same grip and stance every session — note it here.
- **Start weight:** one you could lift 3–4 more times than the target.

How to move

- **2 seconds** up · **1 second** hold · **3 seconds** down.
- Never let a weight drop or a stack slam.
- Breathe out as you push or pull.
- Pain (not effort)? Stop, lighten or shorten the range.

EVERY WEEK

Staying on track

Start each week here: read the line, do the one small action and tick it, and write your if · then plan for whatever could get in the way. Week 3 is where most people stop — the shaded rows are your milestones: week 3, halfway and the final week. R is the bonus Reset week.

Never miss twice
Missing one session is life. Missing two in a row is the start of quitting — so the session after a miss is the one that counts.

Plan it like a meeting
Decide the day and time for every session at the start of the week. "When I have time" never comes.

If · then
Name what could get in the way, and what you'll do instead. "If I work late, I'll train at 7 am."

Bad sessions count
A short or light session on a bad day keeps the habit alive. Showing up beats a perfect plan.

WK	YOUR FOCUS · THIS WEEK'S SMALL ACTION	✓	IF · THEN

Nutrition

Protein high · **Fats** moderate · **Carbs** moderate

- High protein to keep muscle while you lose fat.
- Carbs follow training: more on lifting and circuit days, less on rest days.
- Nuts and seeds are welcome — just a small handful.

WEEK 9 · PEAK & TEST

Your Code9 benchmarks

Test in week 9 while you're fresh. If you did the same tests at the start, write those numbers too — this page is your 9 weeks in one look.

BENCHMARK	START (OPTIONAL)	WEEK 9
Max Push-Ups One set, full range. Knee push-ups count — note which you did.		
Plank Hold Hold with perfect form — stop when the hips sag.		
1-Minute Squats As many full bodyweight squats as you can in 60 seconds.		
2 km Time Trial Run, jog or brisk walk — log your time in minutes.		

What changed?

That's Code9. Nine weeks, done. Log your results online too — your coach uses them to set up your next block.
