Hybrid Training

Athlete · Level 3 · 6 days

The all-round hybrid athlete. Three heavy strength days, each finished with a short power or conditioning finisher, and three endurance days — steady, speed and long — that build strength, power and engine side by side.

How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

Athlete rules

Nutrition

High-quality protein, complex carbs and healthy fats. Adjust calories to how hard you're training.

Recovery

Adequate sleep, active recovery and mobility sessions are what let you train six days a week.

Track your progress

Test strength (1RM) and endurance (run or bike times) at the end of each 3-week block.

Finishers are short

Finishers are 5–10 minutes. Move fast but keep every rep clean — they shouldn't wreck the next day.

Easy runs stay easy

Long runs are zone 2: conversational. Going too hard here steals energy from your lifting.

Heavy, not grinding

Low-rep sets should end with 1–2 good reps left in the tank.

Lift first, run second

Same day? Lift first. Keep the hardest run at least 24 hours after your heaviest leg day.

Pull back when needed

Two bad sessions in a row, poor sleep or aching joints? Drop one set per exercise for a week.

Before you start

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- This is an intermediate plan: it assumes you can already squat, deadlift and press with good technique and run 30+ minutes comfortably.
- Percentages (e.g. 75% of 1RM) refer to your one-rep max. No recent max? Use a weight you could lift 2–3 more times than prescribed.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

My settings & starting weights

In your first week, go through every lift with a light weight and write down your setup — seat and pad numbers on machines, grip or stance on free weights — and the weight you start with. Next time you set up in seconds.

Every lift, every time

- **Machines:** line the moving joint up with the pivot (the coloured dot), pin all the way in.
- **Free weights:** same grip and stance every session — note it here.
- **Start weight:** one you could lift 3–4 more times than the target.

How to move

- **2 seconds** up · **1 second** hold · **3 seconds** down.
- Never let a weight drop or a stack slam.
- Breathe out as you push or pull.
- Pain (not effort)? Stop, lighten or shorten the range.

EVERY WEEK

Staying on track

Start each week here: read the line, do the one small action and tick it, and write your if · then plan for whatever could get in the way. Week 3 is where most people stop — the shaded rows are your milestones: week 3, halfway and the final week. R is the bonus Reset week.

Never miss twice
Missing one session is life. Missing two in a row is the start of quitting — so the session after a miss is the one that counts.

Plan it like a meeting
Decide the day and time for every session at the start of the week. "When I have time" never comes.

If · then
Name what could get in the way, and what you'll do instead. "If I work late, I'll train at 7 am."

Bad sessions count
A short or light session on a bad day keeps the habit alive. Showing up beats a perfect plan.

Nutrition

Protein high · **Carbs** high · **Fats** moderate

- Six training days: under-eating is the fastest way to stall.
- Carbs scale with the session — most on long-run and finisher days.
- Fruit and coconut water during and after long runs.

How to progress inside this phase

- Week by week, add one thing: a rep, a set or a little weight — never all three.
- All sets ticked at the top of the rep range two weeks running? Add 2.5–5% next week.
- Sets missed or short? Keep the weight and own it first.

PHASE 3 · WEEKS 7–8

Power & Peak Performance

Maximise power output and endurance capacity, preparing for performance or competition.
Target effort **8–9** / 10.

How to progress inside this phase

- Week by week, add one thing: a rep, a set or a little weight — never all three.
- All sets ticked at the top of the rep range two weeks running? Add 2.5–5% next week.
- Sets missed or short? Keep the weight and own it first.

Deadlifts
Bar over mid-foot · Chest up, flat back · Push the floor away

Dumbbell Rows
Flat back, hand on the bench · Pull elbow to the hip · No twisting

Dumbbell Snatches
Hinge, then jump the weight up · Punch through at the top · Switch arms at the bottom

Fartlek Run
Fast parts ≈ 8/10 effort · Easy parts: conversational jog · Relaxed shoulders

Front Squats
Elbows high · Bar on the front of the shoulders · Stay upright, knees forward

Goblet Squats
Weight held at the chest · Elbows inside the knees · Stand up as one piece

Incline Bench Press
Bench at 30–45° · Bar to the upper chest · Elbows slightly tucked

Interval Repeats (800 m)
90% effort · Same pace every rep · Jog or walk the recovery

Jump Squats
Squat, then explode up · Land softly through the whole foot · Reset before the next rep

Kettlebell Snatches
Swing, then punch through · Bell rolls onto the forearm softly · Lockout overhead

Kettlebell Swings
Hinge, don't squat · Snap the hips forward · Bell floats to chest height

Long Run
Steady, conversational pace · Short, light strides · Drink and fuel if over 60 min

Military Press
Glutes tight, ribs down · Bar close to the face · Head through at the top

Overhead Press
Glutes tight, ribs down · Bar close to the face · Head through at the top

Plank
Elbows under shoulders · Squeeze glutes and quads · Breathe — don't hold your breath

Power Cleans
Bar close, flat back · Jump and shrug · Fast elbows, catch on the shoulders

Pull-Ups or Chin-Ups
Dead hang to start · Chin over the bar · Palms in for chin-ups

Push Press
Small dip at the knees · Drive up with the legs · Press to lockout

Push-Ups
Plank position — no sagging · Elbows at 45° · Chest close to the floor

Romanian Deadlifts
Bar close to the legs · Hips back, soft knees · Flat back — stop before it rounds

Seated Dumbbell Shoulder Press
Back against the pad · Press straight up · Lower to chin height

Sprint (100 m)
Fast and relaxed · Tall posture · Drive the arms

Sprint Repeats (400 m)
Hard but even pace · Same time on every rep · Walk or jog the recovery

Steady Run
Moderate, even pace · You can speak in sentences · Relaxed shoulders, light feet
