How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

Hybrid basics

Nutrition

Balance your carbs, proteins and fats — and hydrate consistently, especially on endurance days.

Recovery

Prioritise sleep, stretching and foam rolling to minimise injury risk and perform better.

Adjust to your body

Tailor intensity to how you feel, particularly in the later weeks. Adjusting isn't quitting.

Easy means easy

Steady swims, long runs and recovery days: you should be able to talk in full sentences.

Hard means hard

Fartlek fast parts, tempo runs and sprints: controlled, but properly uncomfortable.

"Until failure"

Means technical failure: stop the set when your form breaks, not when you collapse.

Lift first, run second

If you do both on one day, lift first. Keep heavy leg days and hard runs at least 24 hours apart.

New goals every 3 weeks

Each phase has its own goal. Note a benchmark in week 3, 6 and 9 — a lift, a run time, a swim distance.

Before you start

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- Only swim where it's supervised or you're confident in the water — otherwise use the row or cycle alternative.
- Power cleans and front squats are technical lifts. Learn them with a coach or an empty bar before adding weight.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

My settings & starting weights

In your first week, go through every lift with a light weight and write down your setup — seat and pad numbers on machines, grip or stance on free weights — and the weight you start with. Next time you set up in seconds.

Every lift, every time

- **Machines:** line the moving joint up with the pivot (the coloured dot), pin all the way in.
- **Free weights:** same grip and stance every session — note it here.
- **Start weight:** one you could lift 3–4 more times than the target.

How to move

- **2 seconds** up · **1 second** hold · **3 seconds** down.
- Never let a weight drop or a stack slam.
- Breathe out as you push or pull.
- Pain (not effort)? Stop, lighten or shorten the range.

EVERY WEEK

Staying on track

Start each week here: read the line, do the one small action and tick it, and write your if · then plan for whatever could get in the way. Week 3 is where most people stop — the shaded rows are your milestones: week 3, halfway and the final week. R is the bonus Reset week.

Never miss twice
Missing one session is life. Missing two in a row is the start of quitting — so the session after a miss is the one that counts.

Plan it like a meeting
Decide the day and time for every session at the start of the week. "When I have time" never comes.

If · then
Name what could get in the way, and what you'll do instead. "If I work late, I'll train at 7 am."

Bad sessions count
A short or light session on a bad day keeps the habit alive. Showing up beats a perfect plan.

WEEK 9 · PEAK & TEST

Your Code9 benchmarks

Test in week 9 while you're fresh. If you did the same tests at the start, write those numbers too — this page is your 9 weeks in one look.

BENCHMARK	START (OPTIONAL)	WEEK 9
Back Squat 3RM Build up over 4–5 sets to a heavy, clean triple. Log the weight.		
5 km Time Trial Even pace, all out by the last kilometre. Or a 2 km row — note which.		
Max Push-Ups One set, full range.		
Max Pull-Ups Dead hang to chin over the bar. Assisted counts — note the assistance.		

What changed?

That's Code9. Nine weeks, done. Log your results online too — your coach uses them to set up your next block.
