Hybrid Training

Explosive · Level 3 · 6 days · Specialist

Jump higher, sprint faster, hit harder. A power and speed plan built around plyometrics, throws, power cleans and sprints — backed by strength work and a full-body superset day that builds the muscle to produce force.

How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

Power rules

Fast or not at all

Every jump, throw and clean should be fast. Slow reps build fatigue, not power.

Land like a cat

Quiet, soft landings with knees over toes. Loud landings mean you're done for the set.

Rest is part of the rep

Rest 60–90 s between circuit rounds — longer in phase 3. Fresh muscles produce more force.

Fewer, better contacts

Phase 3 cuts the reps and raises the quality. That's not easier — it's more specific.

Strength feeds power

The squat, clean and superset work build the engine your jumps run on. Don't skip them.

Recovery

Adequate sleep, active recovery and mobility sessions support performance.

Track your progress

Test your broad jump, a sprint time and your power clean at the start and the end.

Watch the joints

Achy knees, shins or Achilles? Swap jumps for the strength version that day and tell your coach.

Before you start

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- Jump and land on a forgiving surface — grass, a track or gym flooring — never on concrete.
- Quality first: stop a plyometric set the moment you stop landing softly or jumping fast.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

My settings & starting weights

In your first week, go through every lift with a light weight and write down your setup — seat and pad numbers on machines, grip or stance on free weights — and the weight you start with. Next time you set up in seconds.

Every lift, every time

- **Machines:** line the moving joint up with the pivot (the coloured dot), pin all the way in.
- **Free weights:** same grip and stance every session — note it here.
- **Start weight:** one you could lift 3–4 more times than the target.

How to move

- **2 seconds** up · **1 second** hold · **3 seconds** down.
- Never let a weight drop or a stack slam.
- Breathe out as you push or pull.
- Pain (not effort)? Stop, lighten or shorten the range.

EVERY WEEK

Staying on track

Start each week here: read the line, do the one small action and tick it, and write your if · then plan for whatever could get in the way. Week 3 is where most people stop — the shaded rows are your milestones: week 3, halfway and the final week. R is the bonus Reset week.

Never miss twice
Missing one session is life. Missing two in a row is the start of quitting — so the session after a miss is the one that counts.

Plan it like a meeting
Decide the day and time for every session at the start of the week. "When I have time" never comes.

If · then
Name what could get in the way, and what you'll do instead. "If I work late, I'll train at 7 am."

Bad sessions count
A short or light session on a bad day keeps the habit alive. Showing up beats a perfect plan.

WK	YOUR FOCUS · THIS WEEK'S SMALL ACTION	✓	IF · THEN
1	**"You don't need to feel ready. You need to show up."** Complete every planned session this week — even the ones that feel bad.	☐	IF _____ THEN _____
2	**"The novelty is wearing off. That's where the real training starts."** Write down the days and times you'll train next week.	☐	IF _____ THEN _____
3	**"This is the week most people stop. You're not most people."** Never miss twice: if you skip a day, the next session is non-negotiable.	☐	IF _____ THEN _____
4	**"Week 4. You've already outlasted the excuse."** Compare one lift with week 1 — write the difference in your notes.	☐	IF _____ THEN _____
5	**"Halfway. Look back at week 1 — that was you five weeks ago."** Write down one thing that feels easier now.	☐	IF _____ THEN _____
6	**"Strong isn't a feeling. It's a habit you've built."** Check your progress: weight, one measurement, one photo.	☐	IF _____ THEN _____

8	**"The last weeks show who you've become."** Plan your week 9: when you'll test, and what you want to beat.	☐	IF _____ THEN _____
9	**"Nine weeks. Code9. Done — and just getting started."** Test your benchmarks and write down your week 1 vs week 9 numbers.	☐	IF _____ THEN _____

How to progress inside this phase

- Week by week, add one thing: a rep, a set or a little weight — never all three.
- All sets ticked at the top of the rep range two weeks running? Add 2.5–5% next week.
- Sets missed or short? Keep the weight and own it first.

How to progress inside this phase

- Week by week, add one thing: a rep, a set or a little weight — never all three.
- All sets ticked at the top of the rep range two weeks running? Add 2.5–5% next week.
- Sets missed or short? Keep the weight and own it first.

PHASE 3 · PEAK POWER · WEEKS 7–8

Day 1 · Lower-Body Power

WARM-UP FIRST · CIRCUIT · TARGET EFFORT 8–9 / 10 · CIRCUIT × 4 ROUNDS

Each column is one week of this session: write the date at the top, tick each set as you finish it, write the weight. 4 rounds, moving straight through the five exercises. Rest 2 minutes between rounds.

WEEK 9 · PEAK & TEST

Your Code9 benchmarks

Test in week 9 while you're fresh. If you did the same tests at the start, write those numbers too — this page is your 9 weeks in one look.

BENCHMARK	START (OPTIONAL)	WEEK 9
20 m Sprint Best of 3, full rest between. Log your best time in seconds.		
Power Clean 3RM Build up to a fast, clean triple. Stop when the bar slows.		
Max Push-Ups One set, full range.		
Broad Jump Best of 3 — measure from the start line to your heels.		

What changed?

That's Code9. Nine weeks, done. Log your results online too — your coach uses them to set up your next block.
