Hybrid Training

Race · Level 3 · 6 days

Built for functional fitness racing — the events that combine running with strength stations. Threshold runs, 800 m to mile repeats and long aerobic runs, paired with heavy lifting and race-style work: sled pushes, farmer's carries, burpees and kettlebell swings.

How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

Race rules

Nutrition

Adequate protein, carbs and fats — and enough of them to support recovery and performance.

Recovery

Prioritise sleep, mobility and hydration to stay injury-free.

Monitor progress

Benchmark a lift and a run time at the end of each block. Write them down.

Know your paces

Threshold ≈ 80–90% (hard, steady). Intervals ≈ 90%. Long runs ≈ 60–70% (conversational).

Practise transitions

In conditioning work, move straight from station to run — that's what race day feels like.

Stations need strength

Heavy squats and deadlifts make sleds and carries feel lighter. Don't skip the lifting days.

Long runs build the engine

Most race fitness comes from easy miles. Keep long runs slow enough to talk.

Taper before race day

Racing after week 9? Halve the volume in the final 5–7 days and keep a little intensity.

Before you start

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- This is an intermediate plan: it assumes you can already squat, deadlift and press with good technique and run 30+ minutes comfortably.
- Percentages (e.g. 75% of 1RM) refer to your one-rep max. No recent max? Use a weight you could lift 2–3 more times than prescribed.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

My settings & starting weights

In your first week, go through every lift with a light weight and write down your setup — seat and pad numbers on machines, grip or stance on free weights — and the weight you start with. Next time you set up in seconds.

Every lift, every time

- **Machines:** line the moving joint up with the pivot (the coloured dot), pin all the way in.
- **Free weights:** same grip and stance every session — note it here.
- **Start weight:** one you could lift 3–4 more times than the target.

How to move

- **2 seconds** up · **1 second** hold · **3 seconds** down.
- Never let a weight drop or a stack slam.
- Breathe out as you push or pull.
- Pain (not effort)? Stop, lighten or shorten the range.

EVERY WEEK

Staying on track

Start each week here: read the line, do the one small action and tick it, and write your if · then plan for whatever could get in the way. Week 3 is where most people stop — the shaded rows are your milestones: week 3, halfway and the final week. R is the bonus Reset week.

Never miss twice
Missing one session is life. Missing two in a row is the start of quitting — so the session after a miss is the one that counts.

Plan it like a meeting
Decide the day and time for every session at the start of the week. "When I have time" never comes.

If · then
Name what could get in the way, and what you'll do instead. "If I work late, I'll train at 7 am."

Bad sessions count
A short or light session on a bad day keeps the habit alive. Showing up beats a perfect plan.

WK	YOUR FOCUS · THIS WEEK'S SMALL ACTION	✓	IF · THEN

8	**"The last weeks show who you've become."** Plan your week 9: when you'll test, and what you want to beat.	☐	IF _____ THEN _____
9	**"Nine weeks. Code9. Done — and just getting started."** Test your benchmarks and write down your week 1 vs week 9 numbers.	☐	IF _____ THEN _____

How to progress inside this phase

- Week by week, add one thing: a rep, a set or a little weight — never all three.
- All sets ticked at the top of the rep range two weeks running? Add 2.5–5% next week.
- Sets missed or short? Keep the weight and own it first.

How to progress inside this phase

- Week by week, add one thing: a rep, a set or a little weight — never all three.
- All sets ticked at the top of the rep range two weeks running? Add 2.5–5% next week.
- Sets missed or short? Keep the weight and own it first.
