Hybrid Training

Sport · Level 4 · 5 days · Advanced

For rugby players, field athletes and anyone who loves high-intensity functional training. Heavy compound lifting, a sport-skill and sprint day, varied functional workouts, an endurance day — and yoga and swimming to keep you moving well.

How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

Sport rules

Nutrition

High-quality protein, complex carbs and healthy fats, adjusted to how active your week is.

Recovery

Adequate sleep, active recovery and the yoga + swim day keep you fresh for the game.

Track your progress

Test your 1RM lifts and a sprint or run time at the end of each block.

Game week?

Swap Day 3 for your match or team session, and move the functional workout at least 48 hours away from it.

Scale smart

Every functional workout has a scaled option. Pick the version that keeps you moving.

Speed needs rest

Sprints and power work only work when you're fresh: full recovery between reps.

Heavy days are heavy

Phase 3 strength days are for going heavy with good form — rest a full 3 minutes.

Two-a-day endurance

Day 5 is a run plus a ride: do both back to back, or one now and one later in the day.

Before you start

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- Advanced skills — kipping toes-to-bar, handstand push-ups, clean & jerk — need coaching. Use the scaled options until you own the strict version.
- Prescribed weights (Rx) are a target, not a starting point. Scale the load so you can keep moving with good form.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

My settings & starting weights

In your first week, go through every lift with a light weight and write down your setup — seat and pad numbers on machines, grip or stance on free weights — and the weight you start with. Next time you set up in seconds.

Every lift, every time

- **Machines:** line the moving joint up with the pivot (the coloured dot), pin all the way in.
- **Free weights:** same grip and stance every session — note it here.
- **Start weight:** one you could lift 3–4 more times than the target.

How to move

- **2 seconds** up · **1 second** hold · **3 seconds** down.
- Never let a weight drop or a stack slam.
- Breathe out as you push or pull.
- Pain (not effort)? Stop, lighten or shorten the range.

EVERY WEEK

Staying on track

Start each week here: read the line, do the one small action and tick it, and write your if · then plan for whatever could get in the way. Week 3 is where most people stop — the shaded rows are your milestones: week 3, halfway and the final week. R is the bonus Reset week.

Never miss twice
Missing one session is life. Missing two in a row is the start of quitting — so the session after a miss is the one that counts.

Plan it like a meeting
Decide the day and time for every session at the start of the week. "When I have time" never comes.

If · then
Name what could get in the way, and what you'll do instead. "If I work late, I'll train at 7 am."

Bad sessions count
A short or light session on a bad day keeps the habit alive. Showing up beats a perfect plan.

WK	YOUR FOCUS · THIS WEEK'S SMALL ACTION	✓	IF · THEN

PHASE 3 · POWER & PEAK PERFORMANCE · WEEKS 7–8

Day 6 · Functional Chipper

WARM-UP FIRST · STRENGTH · TARGET EFFORT 8–9 / 10 · REST 90 S BETWEEN SETS

Each column is one week of this session: write the date at the top, tick each set as you finish it, write the weight. A chipper: work through each exercise in order, for time, resting up to 3 minutes between movements. Log your total time in the notes.

WEEK 9 · PEAK & TEST

Your Code9 benchmarks

Test in week 9 while you're fresh. If you did the same tests at the start, write those numbers too — this page is your 9 weeks in one look.

BENCHMARK	START (OPTIONAL)	WEEK 9
Back Squat 3RM Build up over 4–5 sets to a heavy, clean triple. Log the weight.		
5 km Time Trial Even pace, all out by the last kilometre. Or a 2 km row — note which.		
Max Push-Ups One set, full range.		
Max Pull-Ups Dead hang to chin over the bar. Assisted counts — note the assistance.		

What changed?

That's Code9. Nine weeks, done. Log your results online too — your coach uses them to set up your next block.

WEEK 9

Your 9 weeks in one look

Write your working weight from week 1 next to your week 8 weight. Most people are surprised by this page.

	LIFT	WEEK 1 · KG × REPS	WEEK 8 · KG × REPS
01	**Back Squats**		
02	**Deadlifts**		
03	**Bench Press**		
04	**Front Squats**		
05	**Overhead Press**		
06	**Barbell Rows**		
07	**Clean and Press**		
08	**Clean and Jerk**		
09	**Overhead Squats**		

What feels easier now?

What do you want next?

Next step. Nine weeks done — that's Code9. Talk to your coach about your next block: the next level of this series, or a new goal.
