How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

Lean bulk rules

Small surplus
Eat about 250–400 kcal above maintenance. Bigger surpluses add fat, not faster muscle.

Protein every meal
1.6–2.2 g of protein per kg of body weight a day, spread over 3–5 meals.

Double progression
Hit the top of the rep range on every set? Add 2.5 kg (or the next dumbbell) next session.

Close to failure
Most sets end 1–2 reps short of failure. Isolation exercises can go to failure on the last set.

Rest properly
Big lifts: 2–3 minutes. Isolation exercises: 60–90 seconds. Rushing rest steals reps.

Weigh in, adjust
Weigh 3–4 mornings a week. Aim for +0.25–0.5% body weight per week and adjust food by 150 kcal.

Sleep 7–9 hours
Muscle is built while you recover. Poor sleep means poor progress, however well you train.

Deload if you stall
Lifts stalling and joints aching? One week at half the sets, same weights — then push again.

Before you start

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- Use safety bars or a spotter on heavy squats and bench presses.
- A surplus isn't a free-for-all: keep most food whole and minimally processed.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

My settings & starting weights

In your first week, go through every lift with a light weight and write down your setup — seat and pad numbers on machines, grip or stance on free weights — and the weight you start with. Next time you set up in seconds.

Every lift, every time

- **Machines:** line the moving joint up with the pivot (the coloured dot), pin all the way in.
- **Free weights:** same grip and stance every session — note it here.
- **Start weight:** one you could lift 3–4 more times than the target.

How to move

- **2 seconds** up · **1 second** hold · **3 seconds** down.
- Never let a weight drop or a stack slam.
- Breathe out as you push or pull.
- Pain (not effort)? Stop, lighten or shorten the range.

EVERY WEEK

Staying on track

Start each week here: read the line, do the one small action and tick it, and write your if · then plan for whatever could get in the way. Week 3 is where most people stop — the shaded rows are your milestones: week 3, halfway and the final week. R is the bonus Reset week.

Never miss twice
Missing one session is life. Missing two in a row is the start of quitting — so the session after a miss is the one that counts.

Plan it like a meeting
Decide the day and time for every session at the start of the week. "When I have time" never comes.

If · then
Name what could get in the way, and what you'll do instead. "If I work late, I'll train at 7 am."

Bad sessions count
A short or light session on a bad day keeps the habit alive. Showing up beats a perfect plan.

WK	YOUR FOCUS · THIS WEEK'S SMALL ACTION	✓	IF · THEN

Nutrition

Protein high · **Carbs** high · **Fats** moderate

- Maintenance + 250–400 kcal: a small surplus builds muscle, not fat.
- Protein 1.6–2.2 g per kg body weight a day, over 3–5 meals.
- Most of the surplus from rice, pasta, gnocchi, couscous and fruit.

How to progress inside this phase

- Week by week, add one thing: a rep, a set or a little weight — never all three.
- All sets ticked at the top of the rep range two weeks running? Add 2.5–5% next week.
- Sets missed or short? Keep the weight and own it first.
