Peachy Progression

Level 2 · 3 days · Intermediate

Three days a week: two glute days and one upper-body day. The same hourglass goal as the full plan — built for a busy week. The next step after Peachy Pump.

How to use this plan

This is your gym copy of the program: every session of the 9 weeks, phase by phase. Each training day has one page with a column per week. Fill it in on your phone or tablet, or print it.

Logging a session

☐ set to do ☑ set done

- Tick a box for every set you finish, write the weight in kg.
- Rate the session's effort 1–10 and add a note — pain, swaps, wins.
- Fewer reps than the target? Note it. That's your signal to keep the weight next week.

How hard should it feel?

- **5–6** · comfortable, 4+ reps left
- **7–8** · hard, 2–3 reps left
- **9** · 1 rep left
- **10** · nothing left — only on benchmark days

Each phase has its own target effort, shown at the top of every day.

Peachy rules

Feel the glute

Mind-muscle connection first: slow reps and a 1–2 second squeeze at the top of every glute exercise.

RPE 6–7 to start

Weeks 1–3 end every set with 3–4 good reps left. Don't chase failure yet — build clean movement.

Heavy where it counts

Hip thrusts, RDLs and squats get heavier from week 4. Arms and shoulders progress slowly, in the 10–15 range.

Burn-it sets

Weeks 7–9: on the last set of hip thrusts and abductions, drop the weight by ~30% and keep going.

1.5 reps

One full rep plus one half rep counts as one. Brutal on the shoulders — in a good way.

S/S = superset

Do the two exercises back to back, then rest. Saves time, adds pump.

Toned = muscle + lean

The "toned" look is built muscle with less fat over it — so protein and nutrition matter as much as training.

Log your hip thrust

It's your headline lift. Beat it by a rep or 2.5 kg every week or two.

Before you start

- Check with your doctor before starting if you have a heart or lung condition, high blood pressure, diabetes, joint problems or are pregnant — or if it's been a long time since you exercised.
- Use a thick pad under the bar for hip thrusts, and set up the bench so it can't slide.
- Deficit lunges: a 5–10 cm plate under the front foot is enough — more isn't better.
- Stop and seek advice if you feel chest pain, dizziness, unusual breathlessness or sharp joint pain.

My settings & starting weights

In your first week, go through every lift with a light weight and write down your setup — seat and pad numbers on machines, grip or stance on free weights — and the weight you start with. Next time you set up in seconds.

Every lift, every time

- **Machines:** line the moving joint up with the pivot (the coloured dot), pin all the way in.
- **Free weights:** same grip and stance every session — note it here.
- **Start weight:** one you could lift 3–4 more times than the target.

How to move

- **2 seconds** up · **1 second** hold · **3 seconds** down.
- Never let a weight drop or a stack slam.
- Breathe out as you push or pull.
- Pain (not effort)? Stop, lighten or shorten the range.

EVERY WEEK

Staying on track

Start each week here: read the line, do the one small action and tick it, and write your if · then plan for whatever could get in the way. Week 3 is where most people stop — the shaded rows are your milestones: week 3, halfway and the final week. R is the bonus Reset week.

Never miss twice
Missing one session is life. Missing two in a row is the start of quitting — so the session after a miss is the one that counts.

Plan it like a meeting
Decide the day and time for every session at the start of the week. "When I have time" never comes.

If · then
Name what could get in the way, and what you'll do instead. "If I work late, I'll train at 7 am."

Bad sessions count
A short or light session on a bad day keeps the habit alive. Showing up beats a perfect plan.

Nutrition

Protein high · **Carbs** moderate · **Fats** moderate

- Three training days: protein at every meal (1.6–2.2 g per kg) — muscle is built between sessions.
- Bigger carb portions on glute days, smaller on rest days.
- Your AI coach adjusts for age and life stage — including menopause.

Your full targets, meal plan and grocery list: the Code9 Nutrition Guide and your AI Nutrition Coach.

The phases

PHASE 1 Weeks 1–3

Foundation

The week as written: clean movement, glute connection, moderate weights.

Target effort **6–7** / 10

PHASE 2 Weeks 4–6

WEEK 9 · PEAK & TEST

Peak & Test

Taper, test your Code9 benchmarks and finish strong. Target effort **8** / 10.

Your week

DAY 1	DAY 2	DAY 3	DAY 4	DAY 5	DAY 6	DAY 7
Lower A · Glute Max + Tie-in 8 exercises	**Rest or Easy Walk** Recovery	**Upper · Back, Shoulders, Arms** 11 exercises	**Rest or Easy Walk** Recovery	**Lower B · Glute Roundness + Pump** 10 exercises	**Optional Easy Cardio** Recovery	**Rest** Recovery

Peak & Test. One set fewer than week 8, the same weights — and your Code9 benchmarks. Test while you're fresh, then finish the lighter session. Log every result on the benchmark page at the end.

WEEK 9 · PEAK & TEST

Your Code9 benchmarks

Test in week 9 while you're fresh. If you did the same tests at the start, write those numbers too — this page is your 9 weeks in one look.

BENCHMARK	START (OPTIONAL)	WEEK 9
Hip Thrust 8RM Build up to a heavy, clean set of 8 with a full lockout. Log the weight.		
Max Pull-Ups Assisted counts — note the band or machine setting.		
Plank Hold Hold with perfect form — stop when the hips sag.		
1-Minute Squats As many full bodyweight squats as you can in 60 seconds.		

What changed?

That's Code9. Nine weeks, done. Log your results online too — your coach uses them to set up your next block.
